

Rashedur Rahman

Web Developer &
QA Engineer

Objective

As a QA Engineer, my objective is to bring success to the company by implementing effective quality control procedures and collaborate with other teams to install and maintain the most efficient systems.

Profile

I am a Professional Web Developer & QA Engineer. At the beginning of my career I was started to design Powerpoint Presentation on Fiverr. Now I have skills on C, C++, HTML, CSS, PHP, Javascript, C# as well as QA and testing. I love to play with my skills.

Education

BSc in Computer Science & Engineering-

American International University-
Bangladesh (AIUB)
CGPA : 3.00

WORK EXPERIENCE

2016-2017 PRESENTATION DESIGNER

Fiverr / Freelancing Marketplace

It was a very great experience to work in Fiverr as a professional presentation designer. I have design more than 100 presentation for my client.

2016-2018 WEB DESIGNER

DnD IT Firm / Dhaka, Bangladesh

Another Achievement unlocked of my career when I started to work in Fiverr as a Front End designer. I have design more than 20 static web template.

2017-PRESENT WEB DEVELOPER

Fiverr / Upwork / Freelancing Marketplace

I didn't imagine that I could work on Web Application development. Now, I am working at two marketplace as a Web Developer.

Projects

Monkey Ness Game

This is a multi-threaded gaming project developed by using java. This was my class project and I completed it alone.

Virtual Blood Bank

This is a C# based desktop application built with C#. By this application user can request for blood and search for the most nearer suitable donor. After doing this project I learn what's the benefit of teamwork.

Ecommerce Website/ BuyNow

"By Now" is a ecommerce website developed with PHP, JavaScript, Ajax and MySQL. This is the one of my biggest project. After completing this project I learn how to work under pressure and I am becoming more familiar with MySQL Database.

Developing Test Plan for Student Registration System for a University

The objective of this project was to develop a test plan for student registration system of a university. I submitted this project as my final project of software Quality and Testing Course and that was selected as the best project among my class mates.
