Objective

I am seeking a dynamic position as a Junior Web Developer to leverage my passion for web development and programming skills in a collaborative environment. Eager to contribute to the creation of innovative web applications while gaining practical experience in building robust, user-friendly, and efficient web applications. Committed to continuous learning and growth within a supportive team to enhance my expertise in related technologies.

Experience

Software Engineer Intern

September 2022 – November 2022

Touch and Solve

Dhaka, Bangladesh

- Acquired proficiency in PHP Laravel 9 framework and MySQL.
- Developed a full-stack web application using Laravel for backend operations and Blade components for frontend.
- Contributed to various modules of ongoing projects of the respected company.

Projects
